

Dylan Gray Didier

Orlando, FL | dgd0020@auburn.edu | (407) 493-0080

EDUCATION & HONORS

Auburn University | Samuel Ginn College of Engineering

Major: Computer Science

Artificial Intelligence Certification: Auburn University (Expected: May 2028)

Major GPA: 3.57/4.00

Expected Graduation: May 2028

PROFESSIONAL EXPERIENCE

HADDY | St. Petersburg, FL

May 2026 – July 2026

Software Engineering Intern

- Sped up the factory QA process by building a handheld defect logger (Raspberry Pi, Python, ToF sensors) that automatically calculates measurements and syncs data to the cloud.
- Built a Node.js edge driver to control physical factory status lights, handling real-time data lookups in O(1) time with sub-75ms API latency.
- Wrote a Grafana and ClickHouse SQL pipeline to monitor live machine states, improving factory awareness by delivering clear, real-time telemetry updates to operators.
- Built a custom internal website from scratch (HTML, CSS, JavaScript) to replace scattered company folders, creating a single searchable platform for factory training and hardware documentation.

Big Taco Restaurant | Orlando, FL

March 2024 – August 2024

Server/Busser

- Collaborated with a 10+ member team to improve speed and guest experience.

PROJECTS

Personal Website

June 2026

- Designed and developed a responsive engineering portfolio from scratch using HTML, CSS, and JavaScript.
- Managed version control via Git and deployed the production build globally via Cloudflare's edge network.

Loan & Interest Repayment Calculator

September 2025

- Developed a C++ program that calculates loan payoff duration based on balance, APR, and monthly payment, including total interest and final repayment cost.
- Utilized loops, mathematical algorithms, and conditional logic to model real-world amortization behavior.

Virtual Reality Flight Simulator

April 2024

- Designed a web-based 3D environment for a VR flight simulator using HTML and CSS.
- Built interactive visuals and experimented with layout, depth, and user perspective to simulate flight immersion.
- Gained early exposure to graphics rendering, UI design, and problem-solving through iteration.

LEADERSHIP & ACTIVITIES

Association for Computing Machinery | Auburn, AL

August 2025 – Present

- Built a network of peers within computing through chapter events and guest-speaker sessions, gaining exposure to broader computing-community discussions and career-focused insights.

Sigma Pi Fraternity | Auburn, AL

August 2024 – Present

STEM Study Group Leader

- Organized and led study sessions four times a week for new members pursuing STEM majors, creating a supportive academic environment.
- Facilitated problem-solving in subjects such as calculus, physics, and introductory programming, improving academic performance.

Engineering-Focused Study Abroad | Florence, Italy

May 2025 – June 2025

- Participated in a faculty-led engineering program, applying problem-solving and teamwork skills to technical projects in an international setting.
- Collaborated with 17 peers to complete mechanical engineering assignments, strengthening communication and project management abilities.

SKILLS & INTERESTS

Technical: Python, Java, HTML, CSS, C++, JavaScript (Node.js), Pandas, NumPy, Git, Rhino/Grasshopper, Grafana, SQL, Cloudflare, Raspberry Pi

Interests: Artificial Intelligence, Cryptocurrency, Snowboarding, High Diving, Tennis, Golf, Soccer, Football, Gym
